# DISCOVER ADVANCED TECHNOLOGY

## ACHIEVE A SEAMLESS AND STRIKING BLUE EFFECT COLOUR

Octoral's forward-thinking approach means we are always at the forefront of colour innovation, developing solutions in line with OEM colours and new special effects to make sure you can produce premium refinishes, no matter how complex.

Metallic Bright Blue is a new special effect toner further improving the Octobase Eco Plus System. The toner has been formulated for even better colour-matching abilities for bright blue toned OEM cars, including the blue colours used in newer vehicle models.

### PURE COLOUR

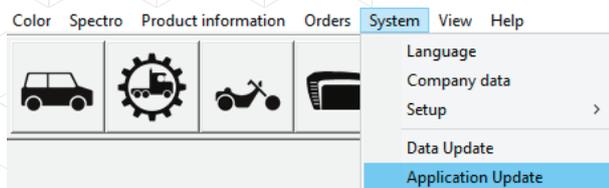

The Metallic Bright Blue toner enhances your ability to mix saturated blue effect colours. The blue metallic particles used in the toner ensure a deeper and more richer effect colour can be achieved which results in an exceptional colour match and striking refinish.

### EASE OF APPLICATION

The simple base coat application makes achieving OEM standard refinishing results easier and quicker to achieve, even on challenging colours with great depth.

### HOW TO ACCESS THE METALLIC BRIGHT BLUE

Please ensure that your COINS software is up to date. The new colour formulations with the new Metallic Bright Blue toner are available on the latest update. To update your COINS software, follow the instruction below.
