DISCOVER RAPID RESULTS

PA35 UV ACTIVE PRIMER AND TU35 UV PRIMER BALANCER

DISCOVER RAPID RESULTS

At Octoral we understand that refinishing time is crucial to business success. As leaders in innovation we have created the UV Active Primer for a more efficient and productive repair process.

SPEED = PRODUCTIVITY

We equip refinish professionals with innovative product that increase business results while delivering premium finishes. Our new UV Active Primer increases performance for rapid repairs, cutting curing time without compromising a smooth finish. It can be applied to multiple substrates and cures in just five minutes when used with a UV lamp.

CHANGE THE GAME

- **Innovative curing:** through the use of UV technology, the primer can cure in just five minutes when used with a UV lamp.
- **Multi-substrate application:** it can be applied directly to suitably prepared e-coat, steel, galvanized steel, aluminium, and most common automotive plastics.
- **Unlimited pot life:** the product can be mixed and used throughout the week due to its unlimited pot life. Store it in a UV resistance container to maintain the mixture.
- **No spray gun cleaning:** we recommend a dedicated spray gun for the primer- this way you can save time, as there is no need for cleaning the gun after each use, just ensure you cover the nozzle with a UV resistant cap.
- **Excellent properties:** it provides a smooth finish with excellent filling and sanding properties.
- **Rapid application:** ease of use and fast application can boost body shop productivity and greatly improve process times.
- **Highly compatible:** compatible with the Octobase and Octobase Eco Plus Systems.

HOW TO ORDER

Octoral UV Active Primer is available now. The information you will need to order this product is summarised below.

OCTORAL UV ACTIVE PRIMER

Product code PA35
Article number 400950001
Contents 1 L
Per box 6

OCTORAL UV PRIMER BALANCER

Product code TU35
Article number 309100001
Contents 1 L
Per box 6

FIND OUT MORE

An innovative rapid-curing primer that is ideal for premium spot repairs and efficient refinishing.

AN ACCELERATED PROCESS

INNOVATIVE UV CURING

Octoral's latest innovation uses UV light to reduce curing times to just five minutes when used with a UV lamp. The primer cures when the photoinitiators within the coatings are exposed to UV-A light, removing the need for energy-intensive baking or infrared (IR) equipment. The UV Active Primer is an accessible and convenient option for body shops keen to drive performance.

A PRODUCTIVITY BOOST

Everything about our UV Active Primer has been designed to boost your repair process. With its rapid curing times and convenient mixing ratio, the Octoral UV Active Primer will enhance productivity and improve resource efficiency in your body shop.

PERFECT PARTNERSHIPS

We build success on relationships of trust with our partners who share our vision. As we look ahead, our aim is to help ambitious businesses to achieve their full potential. We will give you access to our world-leading expertise, innovative technology and global strength. You can also rely on us for advanced training and responsive local support, giving you total confidence. Partnering with us will drive you to increased competitiveness, profitability and growth today – with even more to look forward to in the future.

Businesses around the world trust Octoral to help shape their future success – join them today.

OCTORAL UV ACTIVE PRIMER APPLICATION

1 Ensure the repair area is prepared according to the TDS.

2 Mix the product according to the TDS.

3 Spray 1-2 coats.

4 Flash-off 5 minutes between coats, and 5 minutes before beginning UV curing.

5 UV cure for 5 minutes, depending on film build and UV lamp type – refer to the TDS for UV lamp specifications.

6 Wipe the repair area with solvent product mentioned in TDS wipe on wipe off.

7 Sand and clean the repair area.

8 Apply the desired Octoral base coat and clear as you normally would.
