DISCOVER THE ULTIMATE FINISH

FP141 UNIVERSAL SURFACERS

DISCOVER THE ULTIMATE FINISH

The FP141 Universal Surfacers are high-performance surfacers designed to deliver the ultimate finish for both sanding and non-sanding processes.

Octoral is renowned for continuous innovation that enhances efficiency, effectiveness and body shop processes both now and in the future. The FP141 Universal Surfacers have been specifically developed to ensure they can satisfy multiple repair needs within a single product.

HIGH PRODUCTION

The FP141 Universal Surfacers can help improve body shop productivity by reducing the process cycle times. Advanced technology means they can be used for wet-on-wet application and sanding, both delivering a high-quality final appearance that offers excellent distinctness of image in basecoat.

Their versatility is just one of many benefits body shops can enjoy when using these surfacers; they offer high film build properties, quick-drying, easy to sand and can be used on small to large repair work on most common automotive substrates.

GREY SHADES

The FP141 Universal Surfacers can be mixed to produce any Octoral grey shade, optimising basecoat colour accuracy and coverage. Grey shade formulas are available in COINS.

The FP141 Universal Surfacers are available in three shades - white, grey and black. Refer to the product detail below for more information.

UNIVERSAL SURFACER WHITE

Product code	FP141W
Article number	402112002
Contents	3 L
Per box	2

UNIVERSAL SURFACER GREY

Product code	FP141G
Article number	402111001 (1 L) 402111002 (3 L)
Contents	1 L, 3 L
Per box	3, 2

UNIVERSAL SURFACER BLACK

Product code	FP141B
Article number	402113002
Contents	3 L
Per box	2

SANDING

Due to advanced formulation, the FP141 Universal Surface is extremely easy to sand, save on time, sanding paper and resources as less sanding is required to produce a flat, smooth final finish.

• GUIDE COAT

The FP141 Universal Surfacer produces a semi-gloss appearance, which means you can easily see where you have already sanded, therefore removing the need for an additional guide coat.

• VERSATILE DRYING

Another key benefit for body shops when using the FP141 Universal Surfacer, it is fast drying properties, it can be cured within a couple of hours at 20 °C, as well as forced dried at 60 °C or via Infrared – versatile drying options to suit any body shops working conditions.

FEATURES & BENEFITS:

SANDING

Features	Benefits
High-build film properties	<ul style="list-style-type: none"> • Fill and prime minor scratches • Use of one product for multiple purposes
Semi-gloss final appearance	<ul style="list-style-type: none"> • Smooth base that is optimal for Octoral basecoats • Achieve high coverage and colour accuracy on end result
Ease of sanding	<ul style="list-style-type: none"> • Save time, resource, consumables due to good sandability • Improved product formulation in comparison to other products
Flexible drying	<ul style="list-style-type: none"> • Fast drying – drying in a couple of hours at 20 °C • Can be dried to suit your body shop working conditions

WET-ON-WET

The FP141 Universal Surfacer lays down a smooth, even, semi-gloss finish in just a single application. The flow and levelling properties create the ultimate finish ready for the next stage, which can be applied straight-away, as no drying is required - saving on time, energy, consumables, plus, no additional cleaning is required prior to topcoat application.

• E-COATED PANELS

A key advantage of using the FP141 Universal Surfacer, it can be applied directly onto e-Coated panels without the need for sanding prior, increasing efficiencies by reducing this step as well as the subsequent cleaning from the process time.

• APPLICATION WINDOW

With a 15 minute up to 48-hour application window for the next layer, the FP141 Universal Surfacer is perfect for bulk priming and increasing job put-throughs. The wide window increases production as multiple panels can be primed at once without the need for sanding, thus optimising spray booth utilisation and creating a more efficient workflow process.

• FLEXIBLE APPLICATION

The FP141 Universal Surfacer utilises existing Octoral hardeners and thinners, providing greater flexibility while reducing inventory. Simple mixing ratios and excellent application properties make this surfacer easy to mix, apply and deliver an outstanding finish.

WET-ON-WET

Features	Benefits
Wet-on-wet application	<ul style="list-style-type: none"> • One coat application with no compromise on quality • No drying time required, straight-away application of next stage with no downtime
High-quality appearance	<ul style="list-style-type: none"> • Excellent flow and levelling to provide a smooth finish • Ensures distinctness of image in the basecoats
Application	<ul style="list-style-type: none"> • Simple mixing ratio, easy to apply and use
Direct to e-Coat application	<ul style="list-style-type: none"> • No sanding needed prior to application
Wide application window	<ul style="list-style-type: none"> • Prime multiple panels at once • Increase job put through and optimises spray booth utilisation.
