ACHIEVING A SEAMLESS AND STRIKING BLUE EFFECT COLOUR

VIBRANT COLOUR IN A PRECISION MATCH

With a variety of new bright blue car colours recently introduced by car manufacturers, our Octoral colour portfolio can help you accurately match OEM colours and new special effects on all repairs. We have added a new effect toner, Metallic Bright Blue, to enhance the Octobase System colour matching abilities for bright blue toned OEM cars, particularly the blue colours used in newer vehicle models such as Ford N6 and Ford E7-7423.

PURE COLOUR

The blue metallic particles used in our Metallic Bright Blue help you mix more saturated blue colours with a deeper and richer effect to achieve a perfect match with striking results.

EASE OF APPLICATION

The simple application makes achieving OEM-standard refinishing results easier and quicker, even on challenging colours with great depth.

By reducing the need for an undercoat for certain formulas this toner will save you time.

HOW TO FIND IT

The new colour formulations with MM5575 Metallic Bright Blue toner are available via a data update in your COINS software.

B539 METALLIC BRIGHT BLUE

HOW TO ORDER

To order, use the information below:

Product code	B539
Item no.	510539001
Contents	1 L
Per box	3
