DISCOVER ENHANCED PLASTIC PRIMING

PA65 1K PLASTIC PRIMER

The new PA65 Plastic Primer is Octoral's more recent introduction. The new aerosol packaging enhances the Octoral primer portfolio by offering a quicker and simpler application solution to plastic priming.

ENHANCED PRIMING

The PA65 Plastic Primer is a one-component adhesion primer based on special resins for enhanced adhesion on the most common plastic parts used in the automotive industry. This ready-to-spray product removes the need for utilising the spray gun, saving on setup and cleaning time. Its convenient packaging also allows for greater reach for hard to access corners. It provides good gloss holdout, is transparent in colour and dries extremely quickly.

It can be used as an adhesion additive with the PH254 High Production Non-Sanding Primer for direct-to-plastic application, helping to reduce process steps, materials and time – up to 30 minutes of the process.

The PA65 Plastic Primer can be used with the Octoral Octabase, Octabase Eco Plus Systems and 2K Topcoats.

HOW TO ORDER

PA65 Plastic Primer is available now. The information you will need to order this product is summarised below.

PA65 1K PLASTIC PRIMER

Product code	PA65
Art. no.	400901005
Contents	0.4 L
Per box	6

FEATURES & BENEFITS:

Plastic primer	Enhanced adhesion for plastic repair process
Aerosol packaging	Quick and simple application
Lower pressure	Easier reach for difficult, hard to access corners
Air and light protection	Consistent quality throughout product shelf life
Ready for use	Removes utilisation of spray gun, saving time and costs
Waste efficient	More economical and limited waste
