

OCTORAL BODY FILLERS AND SPOT PRIMERS

At Octoral we are constantly working to ensure we can provide you a complete product portfolio. Our latest introduction of Body Fillers and Spot Primers means we can now offer you a complete refinishing solution and guarantee an expert base that works perfectly with our Octoral systems.

Our dynamic range of Body Fillers and Spot Primers ensures you no longer need to look beyond Octoral for any of your refinishing needs, offering you a one-stop-solution for premium refinish work.

To help you learn more about our latest products, please see the information below.

BF10 UNIVERSAL BODY FILLER LIGHT

The Universal Body Filler Light is an advanced polyester Body Filler which is designed to fill and finish.

The universally applicable filler works on steel, galvanized steel, aluminium and fibreglass reinforced plastics. It is easy to spread and can be used as a finishing body filler.

BF40 FIBREGLASS BODY FILLER

A two-component, polyester-based Body Filler that has a thixotropic structure containing glass fibres of 3

to 6mm. Its enhanced composition means it does not shrink or have any cracks appear even in very thick layers. Designed for repairing corroded areas, filling in dents and holes, the Body Filler can be applied directly to steel.

BF50 HIGH BUILD BODY FILLER (WHITE)

The white High Build Body Filler can be easily applied in thick layers on large areas without the risk of shrinking or showing hairline cracks. A thixotropic knifing filler which dries in a short amount of time. This filler is the optimal choice for body shops looking for a fast yet precise filler.

BF60 HIGH BUILD BODY FILLER (GREY)

The grey High Build Body Filler is an ideal option for filling uneven areas and dents on numerous surfaces including steel, galvanized steel, aluminium, and polyester materials. The two-component thixotropic filler is easy to use while offering outstanding sanding properties.

BF70 ALUMINIUM BODY FILLER

A two-component, polyester-based body filler that contains aluminium particles and ideal for filling in dents and holes. The composition means the filler does not shrink or crack and it can be applied directly to steel with the possibility of mounting and drilling.

PA80 POLYESTER SPRAY FILLER

This high filling two-component polyester spray filler can be applied using a gravity feed spray gun. Suited for all-round bodywork, it's the perfect option for large repair surfaces. The excellent adhesive properties mean this filler is easy to apply and sand while drying quickly.

PA3 SPOT PRIMER WHITE
PA5 SPOT PRIMER LIGHT GREY
PA7 SPOT PRIMER MID GREY

Designed for spot repairs, the Spot Primers can be used to cover sand through areas for a consistent base. The aerosol canister ensures quick and easy application. Quick-drying properties allow for improved repair process times and it can be used for both solvent and water base repairs.

Available in three shades for even better matching capabilities for both the undercoat and car colour.
