C400 HS420 AIR DRY CLEAR COAT

Drying time is exactly what is needed at any temperature. Fast with lower temperatures, ultra-fast with forced temperatures above 40°C. That gives the HS420 Air Dry Clear Coat optimal versatility. The HS420 Air Dry Clear Coat can be perfectly combined with HS420 hardeners and UNI thinners from the existing Octoral product range.

C300 HS420 SPEED CLEAR

The Formula 1 of clear coats: ultra-fast drying reduces the heating time needed, thereby increasing production. Very suitable for big and small repairs. The HS420 Speed Clear can be perfectly combined with the specially designed HS420 Speed Clear Hardener (H49), HS420 Speed Clear Additive (AP101) and the UNI thinners from the existing Octoral product range.

C500 HS420 SUPERB CLEAR COAT

Simply superb in every way! That is the Octoral Superb Clear Coat, which combines optimum sprayability with high gloss. This makes the clear coat suitable for all spraying jobs that have to meet the most stringent requirements. The HS420 Superb Clear Coat can be perfectly combined with HS420 hardeners and UNI thinners from the existing Octoral product range.
