OCTORAL METALLIC ULTRA FINE BRIGHT

OCTORAL METALLIC ULTRA FINE BRIGHT

THE BRIGHT SOLUTION FOR SPECIAL METALLIC REPAIRS

With the new Metallic Ultra Fine Bright toner, Octoral makes it easy to achieve an exact match of colour and effect on challenging metallic finishes. This technology has been specifically created and added to Octoral's advanced metallic toner range to meet the needs arising from developments in OEM finishes.

DAZZLING EFFECTS - MADE SIMPLE

Thanks to specially shaped aluminium particles, Octobase Eco Plus W969 and Octobase B969 Metallic Ultra Fine Bright create a deep, clear, shimmering effect - like fine silk or silver - from every viewing angle. Its use is fast and

straightforward, following the standard application process for most colours. Our innovative technology makes it easy to match the colour, so there is no need to extend your blending area. Quick, error-free, focused application saves time, energy and material.

THE PERFECT SOLUTION FOR SMALL-SCALE REPAIRS

Octoral Metallic Ultra Fine Bright toner combines with other advanced Octobase Eco Plus and Octobase toners and Octoral clear coats, ancillaries, colour information and mixing equipment to form a complete system for reliable finishes. In addition to regular, larger-scale refinishing, it offers a simple and efficient solution for repairing small-scale damage without having to respray whole components or panels. This technology is also ideal for small repairs on alloy rims, which might otherwise require another product.

THE METALLIC TONER THAT KEEPS THESE CARS SPARKLING

BMW, Citroen, Fiat/Chrysler, General Motors, Mazda, Mercedes, Peugeot, Smart and Volkswagen

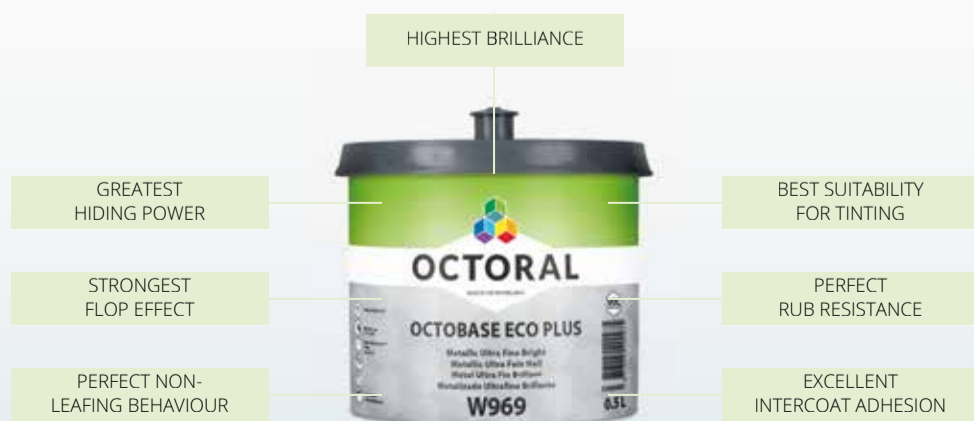

AND MORE...

Octoral Metallic Ultra Fine Bright repairs stunning original finishes on a wide variety of makes and models - and its range is growing. The COINS Colour Retrieval System provides exact colour formulations for each job. For existing customers, please update your COINS software to the latest version to access the right formula.

USING THE BEST OF ALL METALLIC PIGMENTS

Metallic Ultra Fine Bright is formulated using a metallic pigment with first rate quality in:
